### MINERVA CONTROLS

*Front-end Developer & UX/UI Designer*

Remote

Aug 2024 - Current

Lead UI/UX design and front-end development of data-centric dashboards and web applications for industrial automation clients.

- Designed and implemented complex dashboards with interactive charts, dynamic tables, modals, and filters—translating technical requirements into intuitive, real-time visual experiences using Figma and custom HTML/CSS/Python (Dash).
- Improved UI clarity and engagement by refining chart colour schemes and correcting layout inconsistencies, resulting in more readable, cohesive interfaces.
- Enhanced the company website through custom WordPress development, improving performance and user engagement.
- Collaborated closely with back-end teams to integrate RESTful APIs and ensure seamless data flow.
- Maintained automated Selenium tests integrated with GitHub Actions CI/CD pipelines, improving reliability and feedback speed.
- Used Docker to containerise development environments, ensuring consistency between local and production builds.

### FREELANCER

*Front-end Developer & UX/UI Designer*

Remote

Nov 2023 - July 2024

Delivered end-to-end design and development for clients across sectors, combining technical precision with user-centred design.

- Translated client visions into wireframes, prototypes, and user flows using Figma, accelerating development alignment.
- Developed responsive applications using React, Next.js, and TypeScript, applying advanced CSS (Flexbox, Grid, animations) for device-agnostic UIs.
- Maintained 98% design-to-code fidelity, reducing rework and improving delivery speed.
- Conducted UX consultations aligned with accessibility standards (WCAG) and business goals.
- Built reusable UI components and scalable design systems, reducing future technical debt.
